

The FREE Body Composition Report system eliminates guesswork by:

- Breaks the body into fat, muscle, and metabolic efficiencies
- Internal metrics for Fat-free weight, body mass, BMI body fat %, Waist fat ratio (WHR),
- Customized target weight, weight and muscle control
- Adoption of nutritional recovery measures to promote muscle synthesis
- Guide for scientific slimming, training, body rehabilitation, and nutrition

THE RESULT: AN UNSTOPPABLE REVENUE COMPOUNDER

When patients see their personal biological roadmap, the question instantly shifts from: "Should I do this?" to "How fast can I start?"

- 75%+ of prospects bring a spouse or friend or two who also want a free body analysis
- The 60-second assessment allows for quick turnaround for massive patient volume
- Immediate commitment: Typically, 75%+ sign on the spot to start our Toolkit
- Retention that crushes industry norms: 91%+ monthly retention

Most patients return monthly to pick up their medication and get another updated \$299 analysis report (still no charge) they can compare results to on a month-to-month basis.

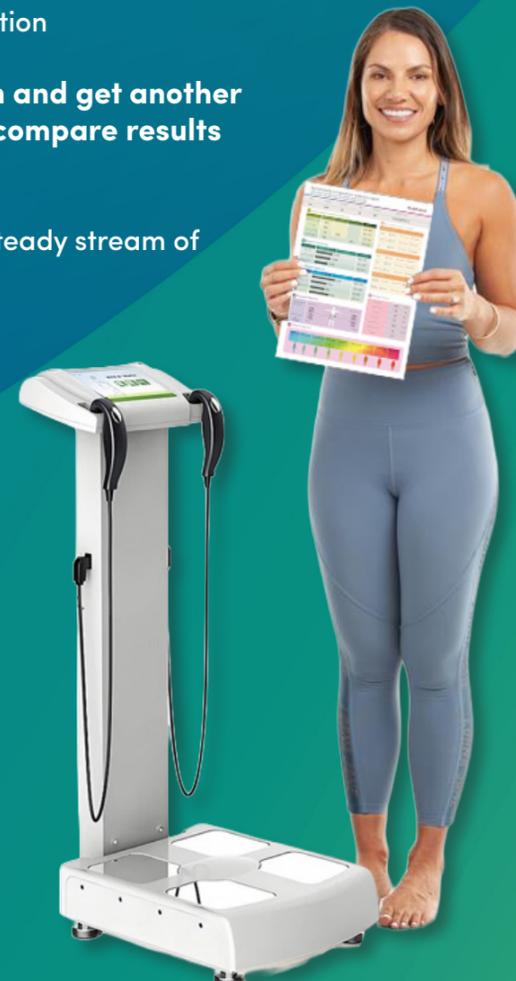

This builds phenomenal patient retention and loyalty with a steady stream of new patients that tag along with their friend every month.

- Monthly wholesale cost of Toolkit: \$120
- Average patient retail: \$347-\$387
- Just 300 patients = \$1,000,000+ in annual profit (from the toolkit alone)

Overhead, including a small office, two non-medical staff members (one to manage your office and sign-up new patients and another to assist and handle incoming phone calls) and advertising stands well under 20% of revenue. Add a similar income from our FDA-approved skin-tightening treatments, and a true seven-figure net is well within reach in year one. Plus, if you set up additional offices anywhere in the world you can multiply your efforts with the perfect absentee ownership business.

The demand is already here.

The only question is: *Are you ready to grab your area?*

Annihilate Your Competition and Force a PERMANENT WAITLIST at Your Clinic from DAY ONE using our SECRET WEAPON:

A FREE \$299 BODY COMPOSITION DIAGNOSTIC REPORT!

THE MULTI-BILLION-DOLLAR WEIGHT LOSS MARKET IS A GOLDMINE *and it's yours for the taking!*

FORGET NORMAL "ADVERTISING."

Our world-class direct-response agencies deploy a lethal, market-specific patient acquisition machine engineered for domination of the local ZIP-code market area.

These agencies flood your market using:

- Hyper-targeted digital ads (Facebook, Instagram, TikTok, X, and more)
- Analog media (radio, TV, newspapers, print)
- Agency-placed kiosks at entrances by the shopping carts at major chain grocery stores, pharmacies, and blood labs, dispensing free hand sanitizer and capturing leads at the point of entry

The result? A predictable, unstoppable flood of qualified prospects through your doors every day from day one. Our proprietary model captures 5X the market share of competitors using the same budget. You're not competing, you're erasing them from the map, resulting in an automatic residual income engine that produces cash flow and profits most business owners will never see.

TOTAL MARKET DOMINATION

While competitors beg for attention with weak offers, our partners DOMINATE with a hook no one else can touch:

A FREE \$299 Comprehensive Diagnostic Body Assessment fully customized for their body condensed into a detailed color report they take home!

Partners use the patented Body Composition Analysis System, a \$25,000 hospital-grade, body composition analyzer: the AVR microcomputer controller measures, based on DXA method statistics, through multi-frequency bioelectrical impedance analysis (MFBIA) analysis of body composition: body weight, BMI (body mass index), non-fat and other health indexes, effectively indicating the physical condition of patients, to provide a basis for reducing. This is considered a landmark achievement in the health industry. Now provide individual health analysis data for each patient, to develop a customized program.

AUTHORITY WITH NO SELLING

Like real medical professionals, our clinics don't "sell." They diagnose and prescribe. The Comprehensive Diagnostic Body Assessment report, personalized for each patient's body and data, delivers clear diagnosis and outcome projections created by a medical team of nutritionists and physicians with clinical and nutritional authority.

THE PRICE MYTH IS DEAD

Our partner clinics never compete on cost. At less than half what the other popular weight loss options go for the monthly cost of the Nonprescription GLP-1 Toolkit is effectively ZERO to the patient — because patients save much more at the grocery store every month.

If Weight Loss Were Simple, You'd Be Thin by Now.

Discover *Why* You're Not.

Free \$299 DIAGNOSTIC BODY ASSESSMENT

Your body's exact blueprint for successful, sustainable weight loss, guaranteed.

FREE diagnostic body assessment delivers clear, objective insight, helping you understand how your body responds and why progress may have stalled. This assessment is informational only and designed to give you clear data, not guesses. Our technology uses a non-invasive electronic pulse system to generate a digital mapping of your body that:

- Breaks the body down into **fat, muscle, and metabolic efficiency**
- Compares biological age versus chronological age and exposes trends that expose accelerated or impaired physiology
- Calculates what your body truly burns, not what apps guess, and
- Captures **40+ critical physiological metrics**

Your two-page, full color diagnostic report is not a scan, instead a medical-grade report produced through a **clinically validated system** supported by a multidisciplinary framework of physicians, nutritionists, and health professionals, powered by specialized computing and AI-driven analysis. The analysis forecasts a customized weight loss regimen using Nonprescription, Pharmaceutical Grade Weight Loss Medications. No injections and no known side effects.

Finally discover how your body will lose the weight, before you ever start. Imagine looking in the mirror and knowing this is the last weight-loss program you'll ever need, while eliminating the endless spending on prescriptions, supplements, and "special" foods that never worked.

Stop wasting time and money. Start following a plan backed by real data and real biology.

BodyAnalyse

NO.	Name	Gender	Age	Height	Date / time
123	xy32	M	24	170	15:58 2024-09-12

1 Human Body Composition Analysis

Measured Value	Fat-free Weight	Weight	Normal Range
Human Body Moisture Content (kg)	40.1		35.6-43.6
Protein (kg)	10.8		9.5-11.6
Inorganic Salt (kg)	3.9	54.8	3.3-4.0
Body Fat (kg)	10.5	67.3	7.6-15.2

2 Muscle Fat Analysis

Low Standard	Normal	Over Standard	Normal Range
Weight (kg)		67.30	54.1-73.1
Skeletal Muscle (kg)		30.80	27.1-33.1
Body Fat (kg)		10.50	7.6-15.2

3 Overweight Analysis

Low Standard	Normal	Over Standard	Normal Range
Body Mass Parameters		23.20	18.5-23.0
Body fat percentage (%)		15.60	10.0-20.0
Fat ratio of waist and hip (%)		0.83	0.8-0.9
Subcutaneous fat		16.00	8.6-16.7

4 Segmental Muscles

Segmental Muscles	Left upper limb	Right upper limb
Segmental Fat	2.8kg	2.8kg
	0.8kg	0.8kg
Visceral Fat Index	8.7kg	8.9kg
	1.6kg	1.6kg
	6.3kg	6.3kg
		24.1kg
		6.3kg
		1.6kg

5 Obesity diagnosis

Lean Type, Lean Muscle type, Standard Muscle type, Standard Type, Obese Type, Muscular Type, Muscular Obese

6 Comprehensive evaluation
